

Project: N-Power Solihull

Value: £8,000.00 // Completion Date: December 2009

Graphic Image worked alongside Wow Contracting on the N-Power project in Solihull. This project required an extremely accurate installation, as the lozenge shapes had to run in uniform and the red colour inserts have a consistent border around them.

We used 3M Frosted Crystal film, which has a 'fleck' effect and the red inserts were optically clear film. This project was completed in two weeks, which was a real achievement for a job with this level of accuracy.
